

Is Your
Insurer Delaying
or Denying
Access to
Proton Therapy?

Did you know that far too many patients who would benefit from proton therapy are being delayed or denied coverage by their insurer?

The Alliance for Proton Therapy Access is a new patient-centered advocacy group working hard to make sure that everyone – EVERYONE! – who needs proton therapy has timely access to it.

We need you!

Please lend your voice to pressure insurance companies and other public health insurers to make sure proton therapy is available to all patients when their doctor believes it's medically necessary.

We'll help you to make your voice heard. Sign up with the Alliance today and help us ensure that no patient's proton therapy treatment is delayed or denied if it is their best hope for beating cancer.
